C O M B I B L I N D S

KOREAN COMBI BLINDS

are designed with two layers of fabric, including a sheer layer and a dim-out layer, made from 100% polyester. With our advanced roller blind system, you can easily control the level of light entering your room with a single cord control system. You can switch between the sheer and dim-out layers to suit your preferences and adjust your blinds to block out light or enjoy a clear view of the scenery outside.
